PROFESSIONAL SUMMARY

Third-year Software Engineering student at Misr International University with hands-on experience in full-stack development, mobile applications, and AI-powered systems. Strong background in building scalable applications using React, Node.js, Flutter, and cloud platforms (GCP/AWS). Experienced in Generative AI, multi-agent systems, and core software engineering principles including OOP, SOLID, and design patterns. Passionate about developing intelligent, production-ready software systems.

EDUCATION

Bachelor of Computer Science — Software Engineering | Misr International University (MIU) | Expected 2027 | Minor: Software Development | GPA: Very Good

TECHNICAL SKILLS

Languages: Java, Python, C++, C, JavaScript, Dart
Frontend: React.js, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, REST APIs, MVC, JWT

Databases: MySQL, MongoDB

Mobile: Flutter, Android (Java/XML)

AI / ML: OpenCV, MediaPipe, Generative AI, LangGraph, Multi-Agent Systems

Cloud / DevOps: Google Cloud Platform (GCP), AWS, Docker, CI/CD, Git, Linux

Software Engineering: OOP, SOLID, Design Patterns (GoF), DSA, UML, Agile/Scrum, Unit Testing

RELATED COURSEWORK

Artificial Intelligence | Software Engineering | Operating Systems | Computer Networks | Database Systems | Data Structures & Algorithms | Software Testing & Quality Assurance | Business Intelligence | New Methods of Software

TECHNICAL PROJECTS

Blink-to-Click [GitHub](#)

- AI-based hands-free interaction system using real-time blink detection for accessibility applications. Integrated Python backend with Android and web frontends, achieving low-latency response.

Tech: Python, OpenCV, MediaPipe, Android (Java/XML), REST APIs

TripLink [GitHub](#)

- Full-stack travel planning platform with JWT authentication, itinerary management (CRUD), and real-time updates. Built a RESTful API backend connected to a responsive React frontend.

Tech: React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

Online Food Ordering System [GitHub](#)

- Online food delivery system built with Spring Boot and Thymeleaf following SOLID principles and GoF design patterns (MVC, Factory, Strategy, Singleton).

Tech: Java Spring Boot, Thymeleaf, MySQL, Maven, OOP, Design Patterns

PintOS Kernel Optimization

- Improved OS performance by redesigning thread scheduling and alarm clock subsystem in PintOS, eliminating busy-waiting and increasing CPU utilization and system efficiency.

Tech: C, Operating Systems, Multithreading, Kernel Programming

CERTIFICATIONS & PROGRAMS

Build with AI: Masr Edition 2026 Google & ITI — Selected among 5,000 developers in Egypt

- Google Cloud Platform (GCP): cloud architecture, deployment, and managed services.
- Building Multi-Agent Systems with LangGraph — multi-agent AI pipelines using LangGraph and LLMs.
- Flutter Agentic UIs — AI-integrated cross-platform interfaces with agentic capabilities.
- Building Real AI Applications — production-ready AI apps leveraging Generative AI on GCP.

Code Generation and Optimization Using IBM Granite IBM SkillsBuild [Credly Badge](#)

- Software Development Using IBM Granite
- Code Generation and Optimization Using IBM Granite
- Use Generative AI for Software Development

AI Fundamentals: Foundations for Understanding AI May 2026 IBM SkillsBuild [Credly Badge](#)

- Core concepts of AI, Machine Learning, and Deep Learning architectures.

AWS Academy Cloud Architecting [161683] Amazon Web Services Academy

- AWS Core Services: EC2, S3, VPC, RDS, IAM, CloudFront, Route 53 — Cloud Architecture Design.
- Scalable & Highly Available Design, Cost Optimization, Security Best Practices on AWS.
- Serverless and Microservices Architectures on AWS.

MIU-CCNA: Introduction to Networks Spring 2026 Cisco Networking Academy & MIU — Network architecture, routing, switching, protocols, and security.
